PROFESSIONAL SUMMARY

Product Manager with 3+ years of experience building API-driven, data-informed digital products. Delivered measurable results: cut onboarding turnaround time (TAT) by 50%, improved payment success by 5%, and led the organization's first partner API integration. Skilled in SQL, A/B testing, and PRD-led Agile delivery in regulated environments. Currently designing an agentic AI assistant (multi-step workflows with human-in-the-loop escalation) and deepening my skills in Generative AI and Agentic AI.

PROFESSIONAL EXPERIENCE

ICICI Bank | Product Manager *Mumbai, India | Jan 2026 – Nov 2026*

- Enhanced Connected Banking (ERP-integrated payments) with 2FA optimization through an expiry-based authentication token and a "favorite workflow" feature, growing **transacting MAU by 20%**, raising **30-day repeat-transactor retention from 55% to 70%** and improving **payment success rate from 89% to 94%**
- Designing an **agentic AI assistant** to automate product demos and first-line troubleshooting for customers, defining multi-step agent workflows and human-in-the-loop escalation, with success measured by **resolution rate, escalation rate & NPS**
- Led end-to-end redesign of the digital onboarding journey, replacing manual checks and email-based follow-ups with automated eligibility validation, exception routing, and real-time status tracking for customers and partners, **cutting onboarding TAT by 50% and increasing monthly new customer acquisition by 30%.**

Tata Capital Limited | Product Manager *Mumbai, India | May 2023 – Jan 2026*

- Owned the product design and rollout of organization's first **API-driven digital loan journey** (consent, KYC, CIBIL (Credit), Perfios (Bank Statement), eligibility, e-sign, & auto-debit setup) via partner platforms **cutting end-to-end TAT by 30%.**
- Drove product development of a **Unified Loan Origination System**: mapped As-Is/To-Be journeys with Sales, Credit, and Operations, wrote PRDs, user stories and acceptance criteria, and managed the backlog and UAT across a 12-month Agile delivery, reducing **system handoffs from 3 to 1, P90 TAT by 50% & support tickets by 40%** through streamlined workflows.
- Shipped a **dynamic repayment schedule** for the Overdraft product, translating regulatory requirements into product specifications and coordinating with SAP team to deliver the configuration within **3 weeks**, resolving an **RBI audit observation** and achieving 100% compliance.
- Designed a dynamic pricing and deviation-approval framework covering 100,000+ pricing scenarios across 8+ variables, replacing manual pricing decisions with rule-based pricing and tiered approvals for exceptions, **reducing pricing error/rework rate from 35% to 5% and achieving 100% audit trail coverage for exceptions.**

Vivify Technocrats| Field Service Technician *Chennai, India | Jan 2020 – Jun 2021*

- Reduced downtime by 20% on container scanning machine installed at Adani Port by running root cause analysis on recurring breakdowns and designing a preventive maintenance schedule, avoiding Service Level Agreement (SLA) penalties and improving operational reliability for port operations.

EDUCATION

- *Master of Business Administration (MBA) in Analytics*, **Indian Institute of Management (IIM), Kashipur** *2021 - 2023*
- *Bachelor of Technology (B.Tech) in Electronics and Communication Engineering (ECE)*, **SASTRA University** *2015 - 2019*

PROJECTS

TimeWise: AI-Powered Activity Discovery & Planning Platform | Python, LangChain, LangGraph, LLM, MCP, LangSmith | Github

- Owned end-to-end MVP development of an AI-powered activity discovery and planning application; identifying user pain points, defining the product vision, target personas, MVP scope, & key user journeys, and prioritizing features.
- Designed an agentic AI workflow using LangChain, LangGraph, Gemini, and MCP-integrated location services, translating natural-language requests into personalized venue recommendations and feasible multi-stop itineraries based on time, budget, location, and preferences.

- Built an AI evaluation framework using LangSmith to assess mode accuracy, category relevance, constraint safety, and itinerary feasibility; achieved 100% accuracy across four baseline test cases on key evaluated checks, identified planning-quality gaps, and iterated on recommendation logic

AI Research Assistant: Multi Source Agentic Research System | Python, LangChain, RAG, LLM | Github Link

- Built an LLM-powered agentic research assistant using LangChain and Gemini that classifies each query, routes it across web and PDF sources, and uses **multi-query** retrieval with **multi-hop** follow-up searches to widen coverage before analysis.
- Designed quality controls (evidence sufficiency check, **output validation** with retry and a **composite memory** layer so the agent corrects itself and reuses past research.

Loan Orchestrator: Stateful Workflow with Human-in-the-Loop Approvals | Python, LangGraph, SQLite | GitHub link

- Designed and built a stateful loan-processing workflow in LangGraph, modelling application validation, parallel KYC, income, and fraud checks, risk assessment, and policy checks, with conditional routing, so only exceptions reach a human reviewer.
- Simulated project designed with the objective to reduce manual review, speed up verification, recover from failures, and keep every decision auditable if applied to a live lending workflow

SKILLS

Product: Product Discovery | PRDs | User Stories | Roadmaps | Agile | Cross-functional Leadership | UAT & A/B Testing
AI & Analytics: Generative AI | LLM | RAG | Agentic AI | LangGraph | LangChain | MCP | Prompt Engineering | Machine Learning
Tools: Python | REST APIs | SQL | MS Excel | Jira | Tableau

CERTIFICATIONS

- **Agentic AI Engineering Specialization,** *Edureka* — *Oct 2026*
- **Generative AI for Product Managers Specialization,** *IBM* — *Apr 2026*
- **AI Product Management Specialization,** *Duke University* — *Mar 2026*
- **Certified Scrum Product Owner (CSPO),** *Scrum Alliance* — *Sep 2025*

ACHIEVEMENTS

- **CX+ Award under "Trust and Transparency" category,** *Economic Times Brand Equity* — *Dec 2025*
- **Star of the Month,** *Tata Capital Limited* — *Jun 2024*
- **Star of the Month,** *Tata Capital Limited* — *Dec 2023*
- **National Winner of Enigma 3.0 - Analytics Case Study Competition,** *IIM Sirmaur* — *Mar 2022*
- **National Semi-finalist of Flipkart Wired 5.0 - Corporate Case Study Competition,** *Flipkart* — *Sep 2021*
